2. SHEHA LAHUDKAR
3. SOUMITRI ROY
4. TANU KASHYAP
5. THRISHA D

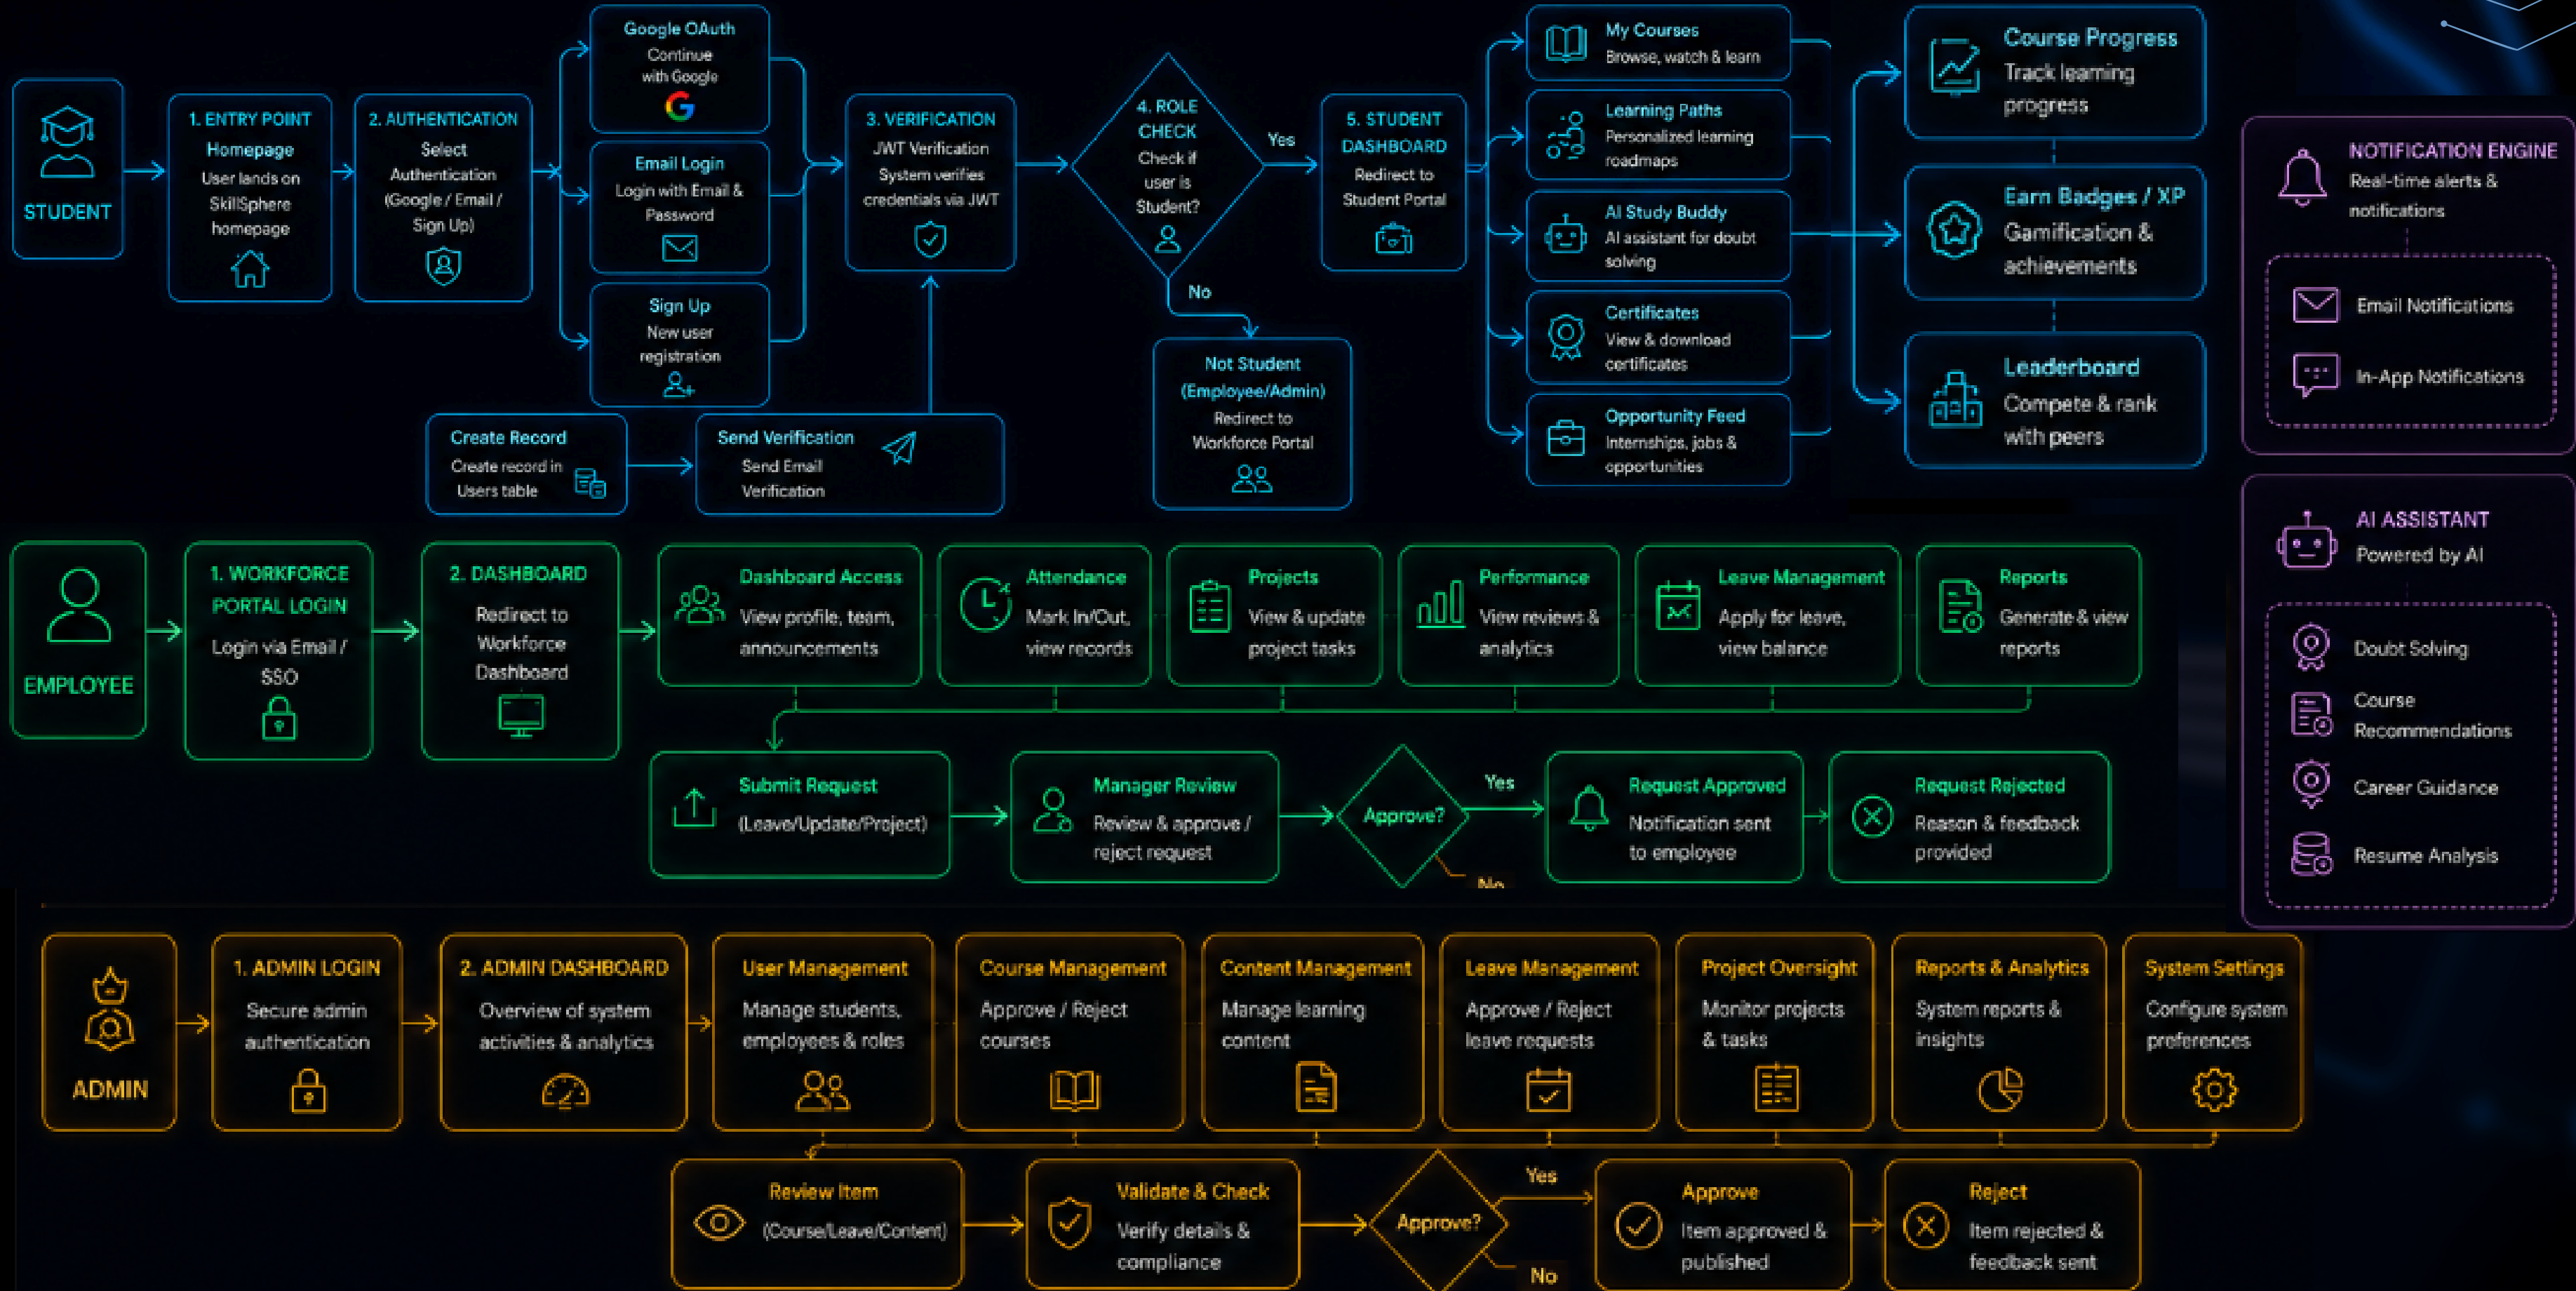

INTRODUCTION

- **Enterprise learning platform is an AI-powered Learning & Workforce Management Platform designed to bridge the gap between skill development and workplace productivity.**
- **Integrates personalized learning, AI-driven recommendations, gamification, and workforce management within a unified platform.**
- **Enables students to follow personalized learning paths, track skills, practice coding, and earn certifications.**
- **Helps organizations manage employees, assign training, monitor performance, and enhance workforce productivity.**
- **Provides real-time analytics and intelligent insights to support continuous learning, performance improvement, and career growth.**

PROBLEM STATEMENT

- **Academic-Industry Skill Mismatch:** Traditional curriculum prioritize theoretical concepts over practical engineering skills, creating a critical gap in job-ready technical talent.
- **Siloed & Fragmented Ecosystem:** Learners endure high cognitive friction by constantly switching across disconnected tools for courseware, coding practice, resume building, and job search.
- **Deficit in Adaptive Mentorship:** Static learning frameworks fail to deliver 24/7 personalized guidance, real-time code debugging, or dynamic career pathing.
- **Recruitment Inefficiencies & Friction:** Employers face prolonged hiring cycles and high screening overhead due to manual resume evaluations lacking verified candidate skill data.

WORKFLOW DIAGRAM

TECH STACK

1. FRONTEND LAYER

React 19
Core Library

JavaScript (ES6+)
Programming Language

Vite
Build Tool

React Router DOM v7
Routing & State

Custom CSS3
Styling (Modern UI, Glassmorphism, Micro-animations)

2. BACKEND LAYER

Java 17
Language & JDK

Spring Boot 3.2.5
Framework (RESTful Web Services)

Spring Security
Security & Role-Based Access Control (RBAC)

Apache Maven
Build Tool

3. DATABASE & STORAGE

MySQL 8.0
Primary Relational Database

Hibernate
ORM Framework
(Hibernate & Spring Data JPA)

Cloud Clever Database
Cloud Database Platform

4. AUTHENTICATION & SECURITY

Stateless Auth
JWT (JSON Web Tokens)

Social Login
Google OAuth 2.0 Integration

5. AI & EXTERNAL INTEGRATIONS

Google Gemini AI
gemini-1.5-flash / gemini-2.0-flash
AI engine for intelligent responses and content generation

YouTube API Integration
Video services for embedding, search and playback integration

Student Authentication Features

- Secure Student Authentication
- Google OAuth Integration
- Password Recovery System
- Role-Based Authorization

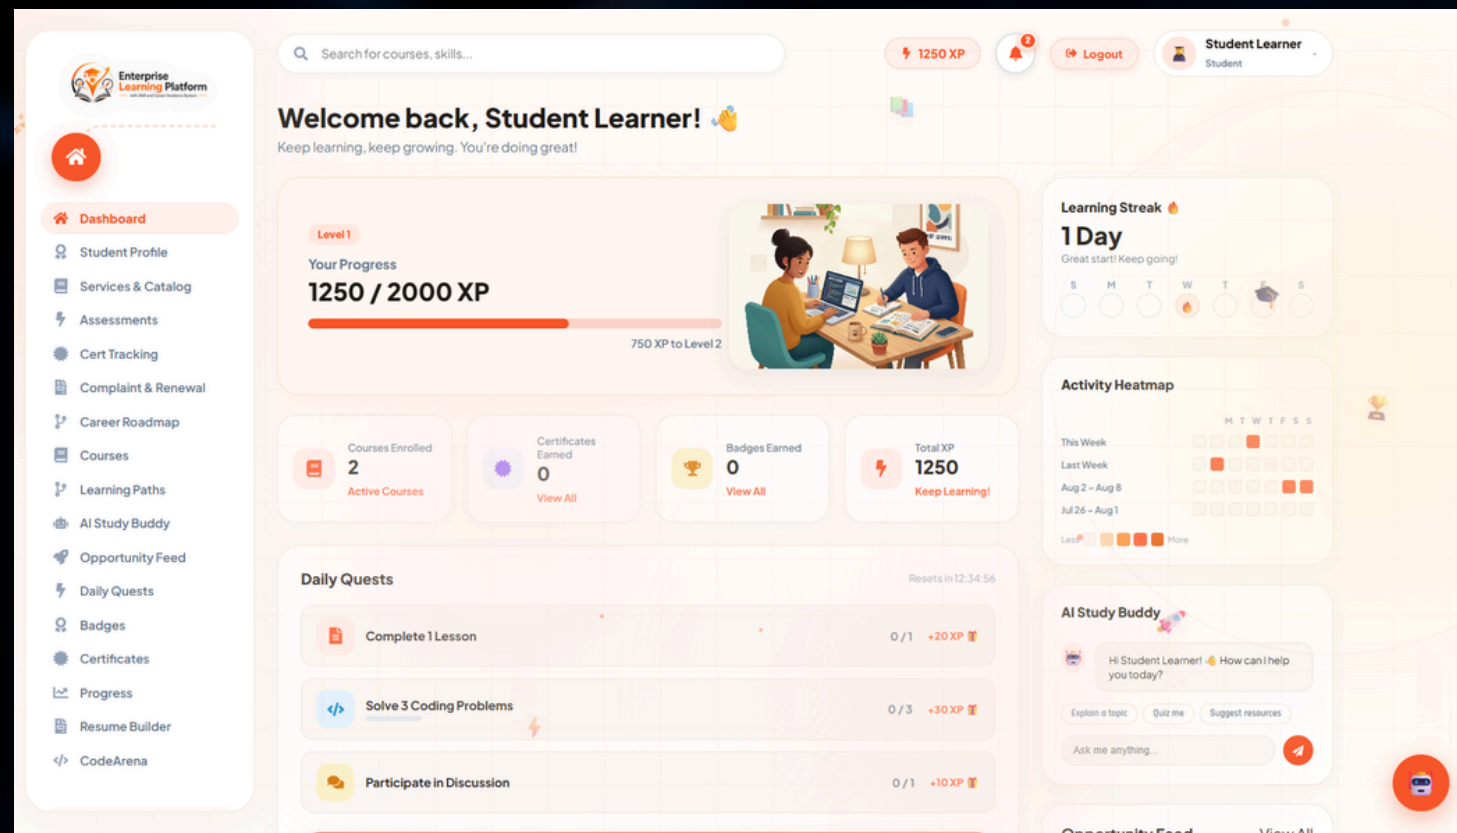

Workforce Authentication Features

- Secure Employee Login
- Organization Email Verification
- Role-Based Access Control

Authentication

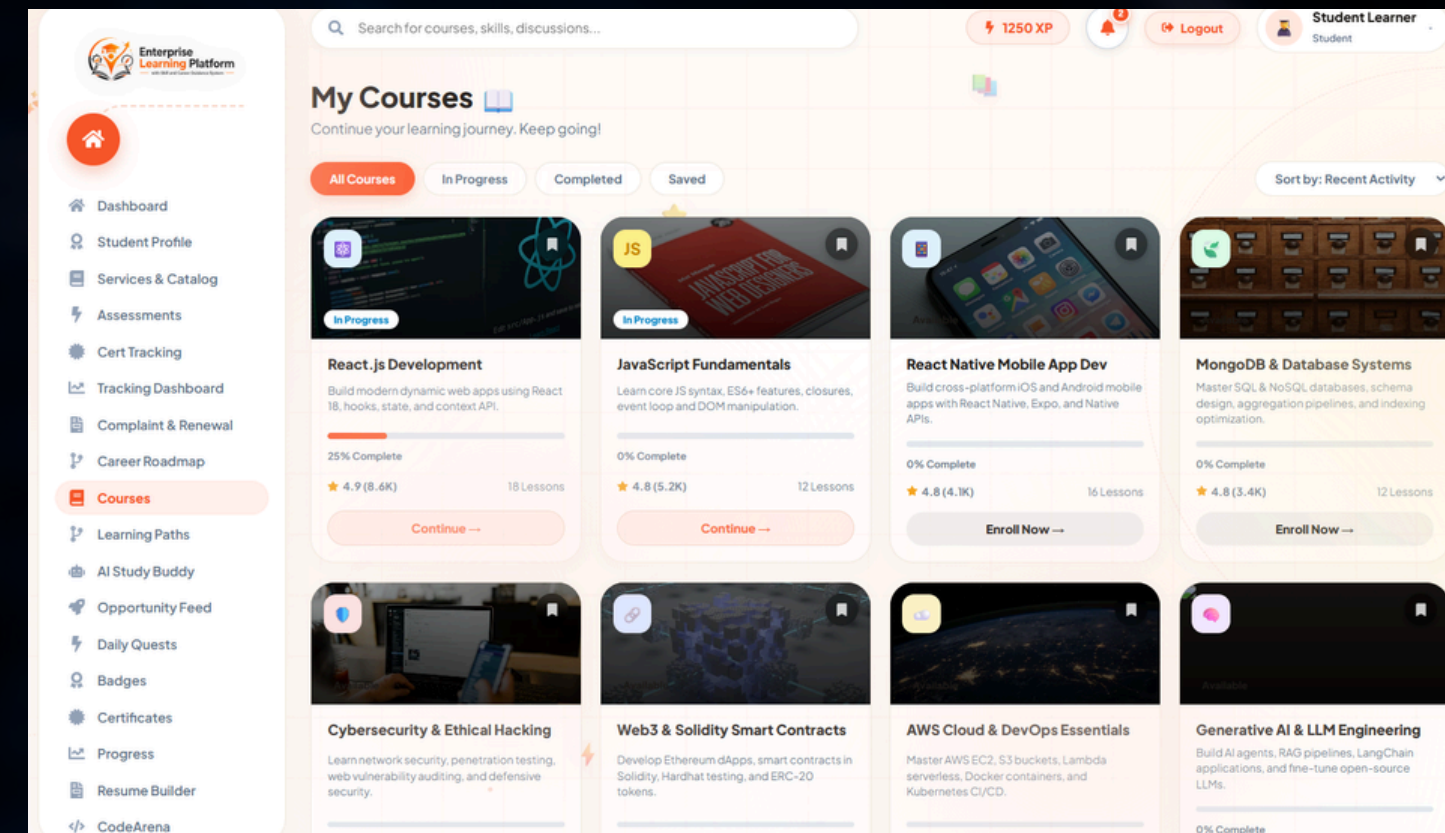

- Secure Administrator Login
- Multi-Level Role Authorization
- JWT Token Validation
- Audit Logging & Security Control

CONCLUSION

- **Unified AI Ecosystem:** Integrates learning, skill building, career growth, and workforce management on a single platform.
- **Comprehensive Features:** Combines personalized learning, AI assistance, coding practice, career opportunities, and enterprise workforce solutions.
- **Multi-Audience Impact:** Empowers learners to excel, professionals to grow, and organizations to build future-ready teams.
- **Future-Proof Architecture:** Secure, scalable, and designed to adapt to next-generation technologies.
- **Core Vision:** Shaping the future of learning and work.

THANK YOU
